I was recently contacted by a representative of Landgraff & Flintab Vekter (LFV) and posed the following question: "What is the main reason that Veidekke chose LFV as their truck scale software provider?" My answer was simple and clear: You know our business! In addition, you sell truck scales and service all type of truck scales; this makes you an obvious choice!

Then known as Kolo Veidekke, our company had over many years completed many acquisitions and mergers. We had many types of truck scales and truck scale software within our organization. We had gained vast experience about truck scale software found on the market.

In 1996 we decided to consolidate to one truck scale software provider. It was very important to our company to process and coordinate invoicing centrally.

For many years we enjoyed a great relationship with LFV; your truck scale software worked as we wanted and your company already serviced most of our truck scales. The choice was so easy. We negotiated a long-term agreement with LFV for your software for use at all Veidekke locations and for the purchase of additional driver terminals.

In 2003, we entered into an updated agreement with LFV where we upgraded from the DOS version to the new Windows version - V2K. The new agreement was extended for the delivery of personal computers and service agreements.

Most recently, June 2011, we signed another new contract with LFV. Among other things, we wanted to upgrade to the new truck scale software program Scaleit W8 with the common database of customers and products.

LFV has been our partner because the products and service perform at a very high level.

Best regards,
Veidekke Industri AS
